

Drum Tipping Station

3defacto's drum tipping station enables ergonomic and safe discharge of liquid or viscous media directly into the process. The drum is emptied via an electrically or hydraulically powered tipping mechanism – either manually or fully automated. Optional features include level sensors, weighing systems, or docking components.

Outstanding features

- Safe and user-friendly handling of standard drums
- Electric or hydraulic drive
- Compatible with spill trays, pumps, and piping
- Optional integration of load cells or empty-level sensors
- Suitable for food, chemical, and pharmaceutical sector
- CIP-capable and documented cleaning in compliance with GMP/FDA

Technical Data

SPECIFICATIONS	
Drum Size	80 liters / 200 liters
Drum Weight	Max. 200 kg
Drive Type	Electric
Delivery	Worldwide
WAG	On request
